THE HAYTIEN WAR.

THE WEATHER AND THE YELLOW FEVER.

Washington, June 21.

Edmund Ruffin of Virginia, who fired the first gun on Fort Sumpter is dead.—He committed suicide near Richmond, on Saturday last, by blowing his head off with a gun. A memorandum was found among his papers, says the Richmond Republic, stating that he could not live under the Government of the United States; that he preferred death to doing so.

Washington, June 21.

Philadelphia special dispatch from Washington to the Evening Telegraph in this city, announces the death of W. H. Seward's wife.

New York, June 21.

Dr. Macky a well known Unionist pronounces the delegation just arrived from that city to confer with the President on the subject of the employment of freedmen in South Carolina composed entirely of original secessionists and rebels throughout the war. He regards their coming as an impudent insult to the United States.

New York, June 21.

Gold unsettled. The quotations have ranged from 140 1-2 up to 141 and then down again to 140 3-4; opinion is divided as to the probable future price. The most prevalent view favors gn advance, while the minority so far rely upon an increase of the exports of the product and especially cotton, that they are prepared to sell short quite freely, and the operations check the otherwise strong upward tendency. The shipments of the Glasgow is $50,000.

Washington, June 21.

The Young Men's Christian Association here have closed their negotiations for the purchase of Ford's Theatre for the sum of $100,000. Several church congregations had been in treaty for it.

There is as yet no decision as to where and when Jefferson Davis is to be tried.

Special to Commercial Washington 21

Gen. Hurlbut is to be court martialed at New Orleans on serious charges. Officers from New Orleans report that Kirby Smith made nothing probably in cotton operations; that he only used cotton to secure pay and subsistence for his army. His Quartermaster lately turned over to Gen. Canby $30,000 in gold as rebel property.

Capt. Mehaffey arrived to-day, having in charge Mr. Gayle of Cahawba, Ala., who advertised proposals to assassinate Mr. Lincoln, for $1,000,000. The prisoner is a lawyer and claims that the affair was a joke. He has applied for Reverdy Johnson and Jas. T. Brady as Counsel.

New York June 21.

Post's Washington special says President Johnson declines appointing Gen. Steele of Ala., as Provisional Governor of that State, on the ground that he has served in the rebel army.

New York, June 21.

Secretary Stanton's report of the operations of his department for the last year of the war is published, from which it appears there were forwarded to the field 489,226 soldiers, and mustered out and discharged 268,104; over 200 flags captured from the rebels. There were 101,950 colored troops in service.

The Paymaster General's report is up to June 30, 1864, and shows disbursements up to that time, amounting to $313,484,865 87.

Boston, June 21.

The Hon. Theophilus Parsons presided over a large gathering of citizens to-day, called to discuss matters relating to the future prosperity of the country. Among the list of speakers were H. Ward Beecher, R. H. Dana, Gov. Boutrell and other prominent men.

New York, June, 21.

Rear Admiral Dalgren having been relieved of the command of the squadron before Charleston and ordered North, has issued a farewell address to the fleet, in which he recounts their services; he is particular to claim for the navy a share in the honors acquired in securing position, notwithstanding it had been asserted in some army official report that the advance could have been made without the assistance of the navy. He refers to the sacrifices made and losses sustained by the navy to show with what devotion, endurance and skill they performed their arduous duties, and speaks in the highest terms of his officers and men.

New York, June 21.

Herald's Charleston correspondent says the delegation from South Carolina, which arrived in Washington yesterday, have instructions to represent to President Johnson the expediency of establishing an efficient plan whereby the relations between the freedmen of the South and their employers in regard to labor and wages can be satisfactory arranged. They propose a willingness to award to the freedmen they may employ, one half their crops as recompense for their labor, but unless they have a guarantee that the labor shall be continuous, it will be of no use to commence crop operations. Another idea is that if the late slaves are allowed to choose their employers occupations they will inevitably select corn planting as the easiest work, or the great diminuntions at the Cotton and Rice crops. The members of this delegation accept the abolition of Slavery, declaring that it is really the slave owners who have received freedom by getting rid of their slaves. They express a determination to be loyal to the Union in future, that they have failed in a great undertaking, and think they were right in seceding; but admit they may have erred. The same Trenholm, the rebel Secretary of the Treasury, went to Columbia and reported to our commandant that he was ready to deliver himself up at any time. He then led off with his seal to carry into effect the military emancipation orders, and was the first to contract satisfactorily with his freedmen, several hundred in number, not one of whom left him. Trenholm before the war was a gradual emancipationists, and his ready adoption of the Gov. views and example in Columbia, had a most salutary effect in that region and under Col. Houghton who is praised by all parties there. The trial will be a fair one. Subsequently an order was read from Gen. Hatch for his arrest: the order was promptly obeyed and Trenholm drove under parole to Orangeburg in his own carriage, and proceeded thence by railroad to Charleston, where he was lodged in the jail. In conversation with Trenholm's son-in-law, he told me that Mr. Trenholm was forced to take the position as Secretary of Treasury under Jeff. Davis. He declined twice and was at last peremptorily ordered to report at Richmond by Jeff. in the following dispatch:

"Your services are needed. Report immediately."

Philadelphia, June 21.

Under the instructions of the Navy Department Seagur's Island was visited yesterday for the purpose of preparing it for the iron clads, which are all to be laid up. There are several monitors in the stream off the city, which came up yesterday from the South Atlantic squadron, including the iron clads. Seagur's Island is the site offered by the city to the Government for the Navy Yard.

Washington, June 21.

Gen. Smith, a renegade New Yorker, late general in the rebel army, has not been arrested as reported, but was on the streets of Macon, on the 9th inst.—Conventions have been held in various counties of Georgia, at which resolutions acknowledging the laws and authority of the United States, were passed, and requesting the President to appoint a provisional Governor until a reorganization is effected.

Washington, June 21.

TRIAL.—Mr. Doster read a paper in in case of Paine. He considered that there was but one question, namely, how far the conviction of the prisoner in doing what he thought was right in attempting the assassination of Seward, should mitigate his punishment. Counsel excused the crime of the prisoner on the ground of his southern education. He was a fanatic and enthusiast. Apart from his crime, Payne's character was worthy of admiration.

A statement of Atzerott was read to the effect that he was one of the party to kidnap Mr. Lincoln, but refused to have anything to do with an assassination. Booth wanted him to murder Andrew Johnson, but he refused.

Washington, June 21.

The Sanitary Commission Storehouse, near the Orange & Alexandria railroad depot, was entirely destroyed by fire this morning.

Mrs. Seward, wife of the Secretary of State, died at 10 o'clock this morning. Her remains will be embalmed and taken to Auburn for interment. The State Department was closed to-day. Distinguished officials called on the family to-day, to sympathise.

New York, June 21.

Steamer Eagle brings Havana dates to 17th. The rebel Gen. Slaughter was driven out of Brownsville by his own soldiers and had reached Havana. John C. Breckinridge, Col. Wood Taylor, Capt. Wilson, A. D. C. to Jeff. Davis, two soldiers and a negro arrived at Cordinas in an open boat on the 11th, probably from the coast of Florida. Breckenridge was accompanied from Cordinas by a Spanish officer, charged by the Government of Cordinas to present him to the Capt. General, and is now in Havana.

The Haytian war continued, but President Jeffrard's troops were victorious in all engagements; the forces of the rebels were decreasing. The U. S. Steamer Palsetine nightly lands a force at Cape Haytian to protect the residence of the U. S. Consul. News from Venezuela is of a satisfactory character. Gen. Falcon has been elected President. A petition signed by most of the wealthy inhabitants of the Island of Cuba has been forwarded to Spain, asking that Gen. Dulcer may not be superceded as Capt. Gen. The weather of Havana is warm and there is the usual quantity of yellow fever.

**Mowbrays' Patent**

**HYDROSTATIC AIR PUMP**

For Elevating Oil, Water &c.

FROM DEEP WELLS.

After fifteen months experiments in order to ascertain the best mode of pumping oil wells, the inventor has been completely successful, and now offers his improvements to oil operators.

**Patent No. 46,148, Issued Nov. 22, 1865 for Air Pumps,**

possesses the following advantages: slow motion and consequently durability; from eighteen to twenty strokes per minute; will deliver a full stream from two inch tubing, maintaining a higher pressure than other pumps running at 86 strokes a minute.

**Patent No. 45,819, Issued January 10, 1865, for Tumple Adjustment,**

enables the operator to trim the blast pipe in the tubing; allows for expansion; and permits easy withdrawal of blast tubes; lowering same, &c. without disturbing the seed bag.

**Patent No. 61,185, Issued Feb. 21, 1865, Sixteen Jet Ejector,**

the latest improvement, and ensures the most economical application of the compressed air This ejector needs only to be seen to command a preference over any other apparatus hitherto used.

The above combinations will remove in a full two inch stream all liquors from a depth of 500 and if required 2000 feet, and command a steady continuous draught from the seams, crevices or fissures of an oil well. The undersigned having been actively engaged in the oil business since 1860, will guarantee the best results in lifting Oil &c., from wells, with less steam power than by any other method whatever. An engine 6 in diameter with 12 inch stroke, running at 80 to 100 strokes, and the pump running at only 18 or 20 strokes, will in every case give satisfaction

PATENT NO. 46,925, ISSUED MARCH 1, 1865, FOR IMPROVED SEED BAG COUPLING,

a novel and convenient method of applying the seed-bag, where the pipes are inserted in a well. See following testimonials:

TITUSVILLE, January 17th, 1865.

To JOHN H. WATSON, Esq.,
President of the Guild Oil Co.

SIR:

I have to report the complete success of Mowbray's Hydrostatic Pump and Ejector, as applied to our No. 1 Well. After fruitless attempts to clear out the well, which has caved in below the seed bag, and previous experiments forbad lifting the tubing, the Ejector was inserted with its blast-pipe inside the tubing and the pump set to work. The quantity of sand, flaxseed, portions of old seed bag driven up, led me to suppose the well must be thoroughly choked. The working barrel being attached to the tubing, and it being found impossible to pass the three-quarter inch pipe through the lower end of the working barrel, it was of course impossible to make an effective sand pump that would pass through the working barrel. We were compelled, therefore, to rely entirely on the Mowbray Pump and Ejector. During two hours working yesterday evening, the tank was filled with water, sand, &c., and after emptying same, about forty barrels more were thrown out, with occasional streaks of Oil. This afternoon, about 4 p. m., the water became exhausted, and a full stream of Oil was thrown out with a violence that fairly shook the tank; this continues, and *more cannot be asked from any Pump or Ejector.*

I may add, our engine is of small size, scarcely equal to five horse power; the pump works thus effectively *making only twenty strokes per minute*, and when this is compared with the dry pumps, working at 70 and 80 strokes per minute, the economy and durability of Mowbray's Pump will be evident to every one. I congratulate the Company on having thus converted, *what must have been an abandoned well, into a paying institution.*

Yours respectfully,
C. F. MORSE, Sup't Guild Farm.

"COPY."

On applying a new "Woods and Mann" 8 horse engine the above well pumped 15 *barrels of Oil in 15 minutes*, with the above Mowbray's Pump and Ejector, this day, Saturday, January 21, 1865.

THOMAS BALDRICK, Engineer.

Titusville, January 21, 1865.

200, BROADWAY, NEW YORK, Jan. 20, 1865.

To G. M. MOWBRAY,
Titusville, Pennsylvania.

SIR:

The success of your Pump at the Guild Well No. 1, induces me to order another for the Benehoof Well You will please ship same, with condition immediately Yours, &c.

JOHN H. WATSON.

To GEORGE M. MOWBRAY,
Titusville, Pennsylvania.

DEAR SIR:

I will thank you to examine our well No. 3, at the Guild Farm, and if your Pump is suitable for pumping the same, please ship one immediately, and see that it is properly set to work. The sucker and pumping arrangements at No. 3 only delivers about four barrels, compared with your Pump at No. 1, which throws out 100 barrels, so that it is owing to the advantage of the pump, and not the deficiency of the well. I wish one to be fixed immediately.

JOHN H. WATSON

OFFICE WATSON PETROLEUM CO. New York. February 24, 1865.

DEAR SIR:

Please send one of your Pumps to the Watson Petroleum Company, for the Drake Well. We have had one of the Newburg Pumps, Crocker's Pattern, which has failed to work, thus involving us in great loss; we therefore request you to give your personal examination of the Pump you deliver. We remain yours,

R. C. ROOT, President

# Miscellany.

### The Old Canoe.

Where the rocks are gray, and the shore is steep,
And the waters below look dark and deep,
Where the rugged pine in its lonely pride,
Leans gloomily over the murky tide;
Where the reeds and rushes are long and rank,
And the weeds grow thick on the winding bank;
Where the shadow is heavy the whole day thro',
Lies at its moorings the old canoe.

The useless paddles are idly dropped,
Like a sea-bird's wings that the storm has lopped,
And crossed on the railing, one o'or one,
Like the folded hands when the work is done;
While busily back and forth between,
The spider stretches his silvery screen,
And the solemn owl, with his dull "too hoo,"
Settles down on the side of the old canoe.

The stern half sunk in the slimy wave,
Rots slowly away in its living grave,
And the green moss creeps o'er its dull decay,
Hiding its mouldering dust away,
Like the hand that plants o'er the tomb a flower,
Or the ivy that mantles the falling tower;
While many a blossom of loveliest hue,
Springs up o'er the stern of the old canoe.

The currentless waters are dead and still—
But the light wind plays with the boat at will,
And lazily in and out again
It floats the length of the rusty chain,
Like the weary march of the hands of time,
That meet and part at the noontide chime,
And the shore is kissed at each turn anew
By the dripping bow of the old canoe.

O, many a time, with a careless hand,
I have pushed it away from the pebbly strand,
And paddled it down where the stream runs quick—
Where the whirls are wild and the eddies are thick—
And laughed as I leaned o'er the rocking side,
And looked below in the broken tide,
To see that the faces and boats were two
That were mirrored back from the old canoe.

But now, as I lean o'er the crumbling side,
And look below in the sluggish tide,
The face that I see there is graver grown,
And the laugh that I hear has a sober tone,
And the hands that I lent to the light skiff wings
Have grown familiar with sterner things.
But I love to think of the hours that flew
As I rocked where the whirls their white spray threw,
Ere the blossom waved, or the green grass grew,
O'er the mouldering stern of the old canoe.

### The New Constitution of Missouri.

The following are the leading features of the New Constitution of Missouri just adopted by a majority of the people:

It declares Missouri a free State forever.

It establishes the equality of all men before the law.

It prohibits legislation interfering with the personal rights of men on account of their color.

It declares that Missouri shall ever remain a member of the American Union

It excludes from the ballot-box and from office traitors, rebels, rebel sympathizers, guerrilla marauders, bushwhackers, and their aiders and abettors

It in like manner excludes Knights of the Golden Circle, Sons of Liberty and O. A. Ks.

It in like manner excludes those who enroll themselves as disloyal, or as Southern sympathizers, to avoid militia duty

It provides for an efficient registration of voters, thereby securing the exclusion of illegal votes.

It removes the rule requiring treason to be proved by at least two witnesses, and leaves it to be proved as any other crime.

It invites imigration from Europe by extending the elective franchise to those persons of foreign birth who have, more than one year before an election, declared their intention, according to law, to become citizens of the United States.

It forbids private, local and special legislation, which for 30 years has cursed the State, and brings the State under a uniform system of general laws.

It prohibits lotteries.

It forbids the Legislature making compensation for emancipatedslaves

It stops the creation of corporation by special acts, with enormous and dangerous powers, and requires all corporations to be formed under general laws.

It prohibits the creation, renewal or extension of the charter of any bank of issue.

It protects the interests of the people by imposing upon stockholders individual liability for the debts of corporations

It secures an efficient system of common schools for the free education of the children of the State.

It gives increased facilities for its own amendment, and allows the people a direct vote upon every amendment proposed.

GAME IN THE SOUTH.—For the last three years men have been so earnestly engaged in hunting and shooting one another in the South, that there has been an enormous multiplication of every species of edible bird and quadruped. Deer and bears are reported to have reappeared. Quails and Rabits literary swarm in the desolate settlements of Virginia.—The Southern buzzards and crows have increased in number tenfold, it is said.—"Some parts of Virginia," says a correspondent of the Press, "are positively alive with carrion-feeding birds." In the meantime they were never so scarce in the North. Our crows and vultures, instructed by their instincts, have migrated to "the dark and bloody ground." "Where the carcass is, there shall the eagles be gathered."

**Messers. CURTIS & WRIGHT**

BEG leave to inform their numerous patrons and the community at large that they are now permanently established in their new quarters

**Under the First National Bank, corner Franklin and Spring Streets,**

where they hope by a strict application to their several departments to merit their share of the patronage of the public. The

ALL NUMBERS HAVE TWO BALANCE WHEELS.

"It is an excellent combination of known devices, for the production of a compact, effective and cheap Portable engine."—Scientific American, December 17, 1864.

Portable steam engines, made after the usual plan of bolting the different parts to the boiler, are peculiarly liable to the foregoing difficulties, resulting from a want of entire stability in the arrangements arising from the unequal expansions and contractions of the various parts attached to the boiler. To remedy such defects has been the object in construction of an improved portable engine as represented in the drawing, where the whole of its parts are attached to a rigid bed plate of cast iron as in stationary engines, which bed plate is firmly secured to the boiler; thus to great compactness and completeness of engine is joined beauty of appearance, and complete independence of the unequal expansion in the boiler. It can be easily detached from the boiler, and thus converted into a stationary engine if required; it also permits the renewal or repairs of the boiler without any disarrangement to the machinery. The engine is entirely complete in itself, having a cylinder with its connections, crank shaft of wrought iron, with two pulleys of different diameters of improved construction, having wrought iron arms, force pump, safety valve, steam gauge, heater, governor, &c. The boiler is of the most approved pattern, with 3-inch tubes for burning resinous wood or coal, and is mounted on very strong and broad truck wheels, which enables it to be moved with great ease and safety from place to place."

We also manufacture

F. CROCKER'S CELEBRATED PATENT DOUBLE ACTING FORCE PUMP,

For forcing air down the well, which all other pumps has failed to do We are turning on from two to three pumps per day. We also recommend

F. CROCKER'S PATENT EJECTOR,

In connection with the pump. F. Crocker claims all other ejectors for forcing air, water, and oil out of oil wells, as an infringement on his application.

We use a self-lubricating Piston, which keeps the pump from heating.

☞ All orders filled within three or four days after receiving the orders.

THE CROCKER

PUMP COMPANY.

Organized under the

Joint Stock Laws of the State of N. Y.,

Are now prepared to furnish their apparatus for

ELEVATING OIL FROM WELLS.

And by their experience are enabled to secure the best results from any well This Company have secured the assignment of four patents, viz

| | |
|---|---|
| Angier & Crocker's, No 43587 | Oct 11, 1864 |
| Angier & Crocker's | Dec. 12, 1861 |
| G M Mowbray's, No. 44879 | Nov 1, 1861 |
| G. M. Mowbray's, | Dec 12, 1861 |

All of which have been thoroughly tested and found effective Parties desirous of Pumping their Wells by this new mode, are cautioned before using other apparatus, to satisfy themselves of the efficiency of the same, before purchasing, and may safely depend on the notice issued by the company whose patents can only drive the oil into the ground, instead of bringing it to the surface. Whilst we are prepared to protect our patents, we are at the same time determined in all cases after giving due notice to infringers, to proceed against the owners of land and working interests, even if it should stop the working of the well This we feel compelled to do, in justice to those who have purchased our apparatus, and to secure our rights.

For further information apply to

A. C. SCHNELL, Ass't Sup't. FRANK THOMSON, Superintendent.

# U. S. 7-30 LOAN.

THIRD SERIES,

$230,000,000

By authority of the Secretary of the Treasury, the undersigned, the General Subscription Agent for the sale of United States Securities, offers to the public the third series of Treasury Notes, bearing seven and three-tenths per cent. interest per annum, known as the

7-30 LOAN.

These notes are issued under date of July 15, 1865, and are payable three years from that date in currency, or are convertible at the option of the holder into

U. S. 5-20 Six per cent.

GOLD-BEARING BONDS

These Bonds are now worth a handsome premium, and are exempt, as are all the Government Bonds, *from State, County, and Municipal taxation, which adds from one to three per cent. per annum to their value*, according to the rate levied upon other property. The interest is payable semi-annually by coupons attached to each note, which may be cut off and sold to any bank or banker.

The interest at 7-30 per cent. amounts to

| | | | | |
|---|---|---|---|---|
| One cent per day on a | | | | $50 note. |
| Two cents | " | " | " | $100 " |
| Ten | " | " | " | $500 " |
| 20 | " | " | " | $1000 " |
| $1 | " | " | " | $5000 " |

Notes of all the denominations named will be promptly furnished upon receipt of subscription.

The Notes of this Third Series are precisely similar in form and privileges to the Seven-thirties already sold, except that the Government reserves to itself the option of paying interest in gold coin at six per cent. instead of 7 3-10ths in currency. Subscribers will deduct the interest in currency up to July 15th, at the time when they subscribe.

The delivery of the notes of this third series of the Seven-thirties will commence on the 1st of June, and will be made promptly and continuously after that date.

The slight change made in the conditions of this THIRD SERIES affects only the matter of interest. The payment in gold, if made, will be equivalent to the currency interest of the higher rate.

The return to specie payments, in the event of which only will the option to pay interest in Gold be availed of, would so reduce and equalize prices that purchases made with six per cent. in gold would be fully equal to those made with seven and three-tenths per cent. in currency. This is

The Only Loan in Market

Now offered by the Government, and its superior advantages make it the

Great Popular Loan of the People.

Less than $230,000,000 of the Loan authorized by Congress are now on the market. This amount, at the rate at which it is being absorbed, will all be subscribed for within sixty days when the notes will undoubtedly command a premium, as has uniformly been the case on closing the subscriptions to other Loans.

In order that citizens of every town and section of the country may be afforded facilities for taking the loan, the National Banks, State Banks, and Private Bankers throughout the country have generally agreed to receive subscriptions at par. Subscribers will select their own agents, in whom they have confidence, and who only are to be responsible for the delivery of the notes for which they receive orders.

JAY COOKE,
Subscription Agent, Philadelphia.

May 1st, 1865.

Subscriptions will be received by the First National Bank, Second National Bank, and Farmers Bank, at Titusville.

Titusville, May 1st, 1865.

VOLUNTARY CORRESPONDENCE from all parts of the Oil Regions, more especially that relating the discovery and production of Oil, and the development of Oil Lands, is respectfully solicited. We want facts, brief and to the point, but no anonymous communications.

A PLANK ROAD TO PITHOLE.—We have previously urged upon our citizens the importance of constructing, as soon as practicable, a plank road, between Titusville and Pithole, thus securing the immense trade and travel already growing out of the wealthy developments in that region.

The increased production from the United States and Morehead Wells, and the new and important strikes in the same favored locality, are everywhere attracting the attention of experienced oil men, and enlisting investments from heavy capitalists.

As yet the Pithole region has no convenient outlet for the enormous product which it already throws upon the market, and the still greater developments in anticipation. Titusville and Oil City each having secured a railroad connection, are natural competitors for this traffic. The distance from Pithole city to either point, is relatively in favor of Oil City, but Titusville can offer a better grade for teamsters, which must fully compensate for the disadvantage of two miles farther hauling.

Let us suppose that a plank road were already laid from this point to the wells. It would then require one hundred and fifty teams to bring the present product of the wells to Titusville for shipment, notwithstanding that they would haul double the quantity (ten barrels) upon plank, than the natural road. This daily transit, exceeding fifteen hundred barrels, would of itself afford no mean revenue for stockholders in the road; and when coupled with passenger travel, and the inevitable increase of oil from future development of the same section, as well as Stewart's Run and Musk Rat Run, its magnitude can scarcely be overstated.

The cost of hauling from Pithole would instantly fall one dollar per barrel, and even then afford the teamster a better profit, by reason of increased freight and faster travel, than at the present rates.

The distance from Titusville to Pithole is but ten miles. The plank required for the road could be obtained at convenient points along the route, and under expeditious management the road could be constructed within sixty days. The cost of the enterprise would not exceed $100,000. We can conceive of no investment which offers a more certain, more immediate or more profitable returns.

It is gratifying to have the assurance that the project has already enlisted the attention of our own capitalists. Messrs. Abbott, Angier, Ames, Chase, and other citizens who appreciate the importance of securing to Titusville this important connection, and the hazard which attends delay, are already moving for its accomplishment. The organization of a company, under such auspices, must create confidence in the success of an enterprise, which, if too long neglected, or abandoned, deprives Titusville of its chiefest commercial auxiliary and support.

☞ Jewells' patent machine stretched leather belting, warranted to give satisfaction or no sale, at factory prices, at J. J. McCREA'S
Spring Street.

OIL SUMMARY.—Mr. A. Raignel, Agent, has lately struck oil on the Watson Flats, one mile from this village, near the *Double Mills*; his well is now producing 80 barrels per day, and bids fair to increase.

The owners of the celebrated Continental Well are drilling it down deeper, with a good show of a large increase over the former product.

THE U. S. Grant well adjoining it is producing 65 to 70 barrels per day; several new wells are going down in the immediate neighborhood.

The Ladies' Well near by has been lately rimed out and drilled deeper, and is now producing and promises to equal anything in this vicinity.

Speculators are turning their attention to Trout Run, nearly opposite this village. Several new wells are going down in this locality.

It is a fact, that more good pumping wells have been struck this season thus far, within a mile of Titusville, than in any other region.

A new well was struck a few days ago, on Pithole Creek, 5½ miles below the U. S. property, near Wood's Well. It is said to be pumping about 200 barrels.

BORED WELLS.—We noticed yesterday a very simple invention of Mr. James Sugget, for improved Bored Wells. The following testimonials have been handed to us for publication:

*To whom these Presents may Concern:*

I, the undersigned, do hereby certify that during the month of May current, that there has been sold in my office thirty thousand dollars worth of territory, of the right to use, and sell, James Suggett's Improvement in Pumps for Bored Wells, by the said Suggett in person, or by his authorized attorney.

I further certify that the Pumps put down in this place, and in places in this vicinity, have proved a success. A. G. POTTER,
Notary Public.

North Adams, Mass., May 29, 1865.

We hereby certify that we have in use on our respective premises, one of Mr. James Suggett's Improved Bored Wells, and that it gives entire satisfaction. We cheerfully recommend it as the cheapest and best Well in use, and affording a constant supply of water:

D. C. McGraw, Clerk of Cortland County; Overton & Collins, Merchants; L. Dexter, Restaurant Keeper; Hanum & Shirley, do; J. A. Scarmerhorn, Counsellor at Law, (3 wells); G. W. Copeland, Merchant; P. E. Knight, Civil Engineer; C. Brown, Inn Keeper; Thos. Allport, Builder; Mills & Stevens, Merchants.

Cortland Village, April 11, 1864.

A well was bored by the above process in front of the Union Hotel, on Franklin street, yesterday afternoon. It was put down fourteen feet in thirty minutes, and when tubed and pumped, yielded a good cold water in great abundance. A large crowd was attracted by the novelty, and several orders were taken for putting down similar wells on different premises.

☞ We always stock of single and double coarse and fine harness. All prices, from $24 to $150, at J. J. McCREA'S.

### Origin of Petroleum.

*Editors Morning Herald*

Every person has his theory as to the origin of Petroleum. I have mine, which is novel and entirely different from the expressed opinions of scientific and experienced oil operators. It is my opinion that the oil comes from coal, but from no beds of bituminous coal that we have any knowledge of, as such beds of coal lay geologically from 5 to 800 feet higher than the sand stone in which the Petroleum is found; and I should suppose it to be extremely difficult, if not entirely impossible, for the oil from such mines to ooze down through the fresh water and get into the sand stone. Quite

I therefore conclude that it comes from coal beds, thousands of feet below the surface, and is distilled from the coal by the natural heat, that is known to exist in the bowels of the earth, at a great depth from the surface. It is manufactured in "God's great Laboratory," and is inexhaustible; and being accompanied by gas, its first cousin, and of a lighter nature than any other element surrounding it, naturally rises to the earth's surface; but when it comes in contact with fresh water, its common enemy, it takes refuge in the strutas of sand stone, and travels in seams or veins until it is relieved from imprisonment by some oil adventurer.

In the region of the country around Oil Creek the presence of oil may be said to be universal, but it is not always found in paying quantities, but its existence in the earth may be compared to the blood in the human existence. Wound the flesh anywhere and the blood will make its appearance; but if you strike a vein it will flow. It is not to be supposed that every one, who puts down a well, is going to be successful; for fortune, that capricious lady, is not always reliable in Oil speculations more than it is in any other business. OIL-SAVER.

Titusville, June 21, 1865.

THE beautiful monument procured by Dan Rice, in honor of the Erie county soldiers who fell in battle, has been formally donated by him to the village of Girard. The monument is a beautiful piece of sculpture, twenty-eight feet in height, cost $6,000, and is the work of Volk, the best artist in Chicago.

The Meadville Republican says the copious rains of the past week have put a new face on the crops, which were beginning to suffer from the effects of the protracted dry spell. Corn never looked better in that region, and other crops are very promising.

THE FOURTH.—There will be no formal celebration of the Fourth of July in Titusville, apart from the splendid exhibition to be given at the Driving Park. This, however, will attract the people *en masse*. In another column we give the programme arranged for the Fair. It includes riding and driving, feats of pedestrianism, gymnastics, equestrianism, for which generous prizes will be distributed among the victors. The best stock in the oil region will be entered to contest the premiums. Balloon ascensions, fire works, &c., will comprise a part of the entertainment. The names of those who have undertaken the management of the affair, furnish a satisfactory guarantee of its success.

☞ A new stock of saddles, at from $5 00 to $60 00 at J. J. McCREA'S.

AMUSEMENTS.—The Wild Men of Borneo are to give a series of Levees, in Crittenden Hall, commencing this afternoon at 2 o'clock, and continuing through the week. They are marvellous specimens of the *genus homo*, and will attract the curiosity seekers. An interesting lecture is delivered at each exhibition. See advertisement.

The Continental Quartette will give two concerts in Crittenden Hall, commencing on Monday evening. They are splendid vocalists, and deserve a handsome reception.

Mose Case, the celebrated guitarist, announces a series of entertainments in Crittenden Hall, commencing on Wednesday evening next. He is to be assisted by John McNare. The programme is not yet announced.

THE want of suitable cross walks in the central portions of the borough is the universal complaint in wet weather. Some of our business men are supplying this deficiency at their own expense. We observe that Messrs. Quimby & Church have laid a substantial crossing at their store on Diamond street. The cost of the work was defrayed by subscriptions among the business men of the neighborhood.

COAL is rapidly falling in price. Great stagnation exists in the Pennsylvania mining section. The quantity sent for the week ending June 3, was 29,498 tons against 102,721 for the corresponding week of the year before, a total decrease of 83,253 tons. The collieries are all unworked, and the miners hold out against a decline in wages equal to the decline of the prices of coal in market.

THE STEAM ENGINE.—We are authorised to say that Messrs. Bain & Copeland, hardware merchants on Franklin street, will give $50 towards the purchase of a large fire engine for Titusville. The proprietors of this paper will contribute the same amount. Let the subscription list be put in circulation without delay. We believe the requisite sum can be obtained to-day.

TIMBER was a decline of 25 cents per barrel on oil here yesterday, and in advance of 25 cents per barrel on hauling.

OIL AT TITUSVILLE.—A report was current yesterday, that a well was struck at Titusville on Tuesday night, and flowed out for six or four hours without interruption. On Thursday morning it had entirely ceased and preparations were made for tubing.

THE MOORE WELL, in front of the Moore House, made a good show of oil on Tuesday night. It has reached the second sand rock, 385 feet.

☞ A new stock of trunks from $2 50 $12 at J. J. McCREA'S.

## OIL WELLS LOCATED.

ERIE MAGNETIC OIL COMPANY.

*OFFICERS:*

JESSE SMITH, *President.*
J. BLENNER, *Vice President.*
Wm. W. REED, *Secretary and Treasurer.*

*MANAGERS*—Wm. W. Reed, Erie; L. W. Smith, N. Y.; E. H. Smith, Erie; Jesse Smith, Titusville; Joseph Blenner, John S. Brown, Erie.

This Company have been organized with a view of developing Oil Territory without the uncertainties which usually attend this business,—for the purchase and sale of lands upon the most favorable terms, and for the location of wells for all parties who may desire its services.

This Company have purchased a quantity

OF LAND ON OIL CREEK

Located on that creek and the principal tributaries of that stream, which will be disposed of in tracts or privileges, and in every case where it is desired oil will be guaranteed to purchasers.

By means of a new instrument constructed upon scientific principles, the properties and peculiarities of which are unknown to all other parties, this Company is enabled to locate oil wells or deposits giving their extent to a certainty which obviates the necessity of boring or sinking a well, without knowing whether oil will be obtained. The Company will to fact every condition of sale or contract which does not prove upon test, to be equal in all respects to what is represented.

An opportunity is here afforded to all to save the thousands of dollars which have in many cases been literally squandered upon an uncertainty.—By their method, the

EXACT LOCATION

OF THE

OIL DEPOSIT IS POINTED OUT!

And no man need bore without finding oil.

All communications addressed to the Erie Magnetic Oil Company, or calls at the office of the Company in Erie, will be promptly responded to.

Address JESSE SMITH, Titusville, Pa. mh30-tf.

ATWOOD'S
## PATENT DRILLING MACHINE,
PILE DRIVER
AND
HYDRAULIC SAND PUMP.

PRACTICAL TESTS having fully demonstrated the superiority of this machine over all others for the purpose of sinking oil wells, the undersigned is now prepared to receive orders for the same.

This machinery comprises everything requisite for the boring of oil wells, excepting the steam engine and cast iron driving pipe, (but will be furnished if desired at a reasonable price,) and dispenses with the use of the Derrick Rope, Bull wheel and other cumbrous and expensive fixtures now in use, and is so arranged, being constructed on wheels and portable, that it can be easily removed for the purpose of sinking wells in different localities.

The detritus is removed from the well by our Patent Hydraulic process, and does not require the removal of the drill from the boring. This process not only removes all the detritus in from 5 to 10 minutes, but likewise effectually clears out and opens all the small oil veins that are so often entirely closed up by the old process of sand pumping.

With this machine and a practical engineer, a well can be sunk from 400 to 600 feet within a period of from 15 to 30 days after the drill pipe has been driven.

Arrangements are being made for the construction and delivery of these machines in New York, Norwich, Newburg, N. Y., and Pittsburg, Pa.

For further information, price, terms, &c., address SIMEON LELAND
ap13-3m Metropolitan Hotel, N. Y.

F. M. HILLS'
## Livery Stable.
Pine Street near Pendleton' Hotel
Titusville, Penn'a.

THE undersigned has opened a first class Livery establishment at the above location. He will keep constantly on hand a superior stock of saddle and driving horses, and all kinds of vehicles for the public accommodation. Extra teams for hauling may be had on application. Terms reasonable.
mar 16-tf F. M. HILL.

### Stolen.

**$100 REWARD.**

STOLEN from the premises of the subscriber on the night of the 5th of June, A DARK BROWN MARE, about six years old. Has two white feet, a stripe in the face, and is business marked. I will pay $100, for the recovery of the horse, and detection of thief, or $50 for either
